

# It's That Time of Year

**Concentrated dirt, pollen, pollutants, and other debris from the air can**

- Contribute to microbiological growth
- Cause severe corrosion
- Create energy robbing deposits
- Interfere with water treatment chemical performance

## **A clean tower**

- Minimizes energy and maintenance costs
- Helps improve microbiological control
- Extends HVAC system life
- Enhances HVAC system reliability
- Improves performance of water treatment chemicals

**Cooling Tower Fill Before/After Cleaning**

**Unlock the savings potential of your system and return money to your operating budget by cleaning the cooling tower.**

**Contact your local Chem-Aqua Services Representative for a no-obligation quote:**

**866.766.0134**
