

Wastewater Treatment

Products, Equipment, and Services

CHEM-AQUA[®]

Water Treatment Solutions[™]

Chem-Aqua Provides Solutions That Solve Water and Wastewater Problems and Improve Plant Economics

Complete Capabilities

Chem-Aqua offers one of the industries most advanced and complete line of products and services for water and wastewater treatment. Our programs remove contaminants, reduce sludge handling and disposal costs, improve influent and effluent quality, and enhance water savings and recycling. Specially-trained Chem-Aqua field representatives work closely with customers to develop comprehensive wastewater treatment solutions that save money and achieve environmental compliance goals.

Problem Solving Expertise

Chem-Aqua provides programs that solve problems and reduce costs. Our expertise helps customers with a wide range of challenges including

- Primary influent treatment to remove organic color, hardness, iron, and suspended solids
- Effluent treatment to remove oil and grease, improve clarity, and accelerate the settling of suspended solids
- Dewatering to reduce the volume and moisture content of wastewater sludge and minimize disposal costs
- Heavy metal removal from industrial waste streams
- Foam and sludge management in biological treatment plants
- Recovery of valuable byproducts from waste streams

Value Added Service

The technical success and economics of a wastewater treatment program depends on how well the program is managed. Because of the importance of service, Chem-Aqua strives to provide the highest level of service in the industry. Our value added service approach allows us to identify opportunities to improve efficiency, reduce costs, and ensure compliance. It helps us look beyond chemical applications to improve our customer's profitability and provide a return on investment. It makes Chem-Aqua a valuable business partner.

Chem-Aqua's complete product line includes

- Organic/inorganic coagulants
- Complete line of emulsion, liquid, and dry flocculants
- Organic/inorganic blends
- Clay-based flocculants and solidification agents
- Metal precipitants
- ECO Bionics® BIO-Amp™ System
- Silicone/oil-based defoamers
- NSF® certified potable water treatment products
- GRAS compliant wastewater treatment products
- Polymer make down, feed, and control equipment systems
- Wastewater analytical services
