

# Simplify Learning

## **Chem-Aqua's Online University** **Simple, Just-In-Time Learning**

- ✓ Improve system efficiency through education
- ✓ Expand operator water treatment system knowledge through online education
- ✓ Convenient access to content 365 / 24 / 7
- ✓ Easy-to-use with any computer that accesses the web
- ✓ Electronic reports, simplified tracking

# Would you like to improve your water treatment program?

Our professional online operator training courses focus on the best ways to improve the efficiency of every system.

## What you will learn

- Why water needs to be treated
- The common causes of corrosion and deposits
- The most common types of microorganisms and how to treat and control them
- The basic types of pretreatment methods, how they work, and why they are important
- The fundamentals of feed and control equipment and how to select and install it

## Benefits

- **Easy Access** - Accessible with any computer connected to the Internet
- **Always Available** - Courses available 24/7, 365 days a year
- **Tracking** - Monitor each employee's progress
- **Certificates** - Certificates of completion provided at the end of each course

## Choose Your Track

### Cooling

- Basics of Water Chemistry and Cycles
- Cooling System Corrosion and Deposit Control
- Cooling System Microbiological Control
- Closed Loop Systems
- Feed and Control Equipment

### Boilers

- Basics of Water Chemistry and Cycles
- Boiler System Corrosion and Deposit Control
- Pretreatment Methods and Equipment
- Closed Loop Systems
- Feed and Control Equipment

Content available in tracks only. Two tracks to choose from. Operator can select one or both.
